

Accelerated Resolution Therapy Consent Child/Adolescent

Client Information	
Client Name:	Date of Birth (yyyy-mon-dd):
Parent/Guardian Name:	Phone Number:
Consent	
<p>I understand that Accelerated Resolution Therapy (ART) is a therapy which is being studied. Research on another form of eye movement therapy has been widely validated by research with civilian PTSD. It is anticipated that research on other applications for ART will also be undertaken in the future.</p> <p>Distressing, unresolved memories may surface through the use of the ART procedure. Some clients have experienced reactions during treatment sessions that neither they nor the administering clinician may have anticipated, including a high level of emotion or physical sensations.</p> <p>Distressing memories may seem to disappear, while more pleasant memories may take their place during ART. Therefore, I should check with an attorney before proceeding if my child needs to recall events for a legal procedure.</p> <p>These negative memories have been more normally processed and are stored in a location that no longer bothers clients. Subsequent to the treatment session, the processing of the incidents/material may continue, and other dreams, memories, flashbacks, feelings, etc. may surface.</p> <p>I understand that if my child has any medical conditions that might put them at risk due to the possibility of a heightened emotional reaction from ART treatment I should check with their medical physician before beginning ART treatment.</p> <p>Before commencing ART treatment for my child, I have thoroughly considered all of the above. I have obtained whatever additional input and/or professional advice I deem necessary or appropriate to have ART treatment for my child and consent to have my child receive ART treatment. I understand I may revoke this consent at any time.</p>
